

# Circular Economy Symposium (CES) 2017

*Boosting Business Reducing Waste*

25-26 April 2017 | Federation House, New Delhi

## About CES 2017

Environmental degradation and resource depletion threaten the sustainability of economic growth in both developed and developing countries. A circular economy is envisaged to create huge economic opportunities, especially making end of life resource recovery more efficient for long term value creation. In this context, the waste management industry will play a key role at the heart of a circular economy with a transition away from the old linear production model towards a resource management approach where the industry acts as a provider of raw materials and energy to the rest of the economy.

With this background, the first edition of Circular Economy Symposium is envisioned to fill in the information gap around huge potential in diverting resources from being dumped in landfills and fresh water bodies using the closed loop environmental solution.

## Summit Objectives

- Provide a platform for Industry (manufacturing industry, service providers, start-ups) to share knowledge and best practices in the sector
- Engage with Government on waste management issues which ail Indian industry
- Showcase case studies which provide insight on application of circular economy principles in waste management/economic value in recycling, recovery and reuse

## Why attend?

Find out:

- How the circular economy presents new and unprecedented opportunities to create wealth and well being
- How it is essential engine to achieve the ambitious UN Agenda 2030 and Sustainable Development Goals
- Innovative strategies and practices of experts and practitioners from the industry, start-ups, government and academia

# Circular Economy Symposium 2017

Boosting Business Reducing Waste  
25-26 April 2017 | Federation House, New Delhi

## Who should attend:

- Manufacturing & Service Industry Personnel
- Waste Management start-ups
- Environment Consultants
- Technology and service providers
- Education/Research Institutes
- Recycling companies/Collectors and reclaimers/Waste haulers
- Clean-tech investors

## Registration Fees

Category	Amount (₹)*
Indian Industry	8,000/-
Government/NGOs/SMEs	6,000/-
Academia/Research Institutes	4,000/-
